Create a database called "sales" with a table called "orders" that contains the following columns: order_id (int), customer_id (int), order_date (date), order_total (decimal).

```sql
CREATE DATABASE sales;

USE sales;

CREATE TABLE orders (
    order_id INT,
    customer_id INT,
    order_date DATE,
    order_total DECIMAL(10, 2)
);
```
